

Irrigation Air & Vacuum Relief Valve

Irrigation system air release valve, also known as drip irrigation air relief valve or [irrigation air valve](#), is mainly used to regulate the amount of air in the pipeline. Air will inevitably enter the pipeline in the agricultural irrigation system. Proper air is conducive to the operation of the agricultural irrigation system, but too much or too little may cause the pipeline system to rupture, so the air valve in the irrigation valve is generally installed in the foreign irrigation pipe network. The country is also vigorously popularizing this, which is conducive to the normal operation of agricultural irrigation systems. The domestic air valve generally has two structures: single and double chambers. According to the volume of the irrigation system, the size of irrigation air release valve is small and the single chamber is large.

❖ Irrigation Air & Vacuum Relief Valve

Product Description	Item No.	Size	Qty./Bag (PC)	Qty./Bag (PC)
Air & vacuum reflief vavle	AV0112	1/2" BSP	100	1200
Air & vacuum reflief vavle	AV0134	3/4" BSP	10	200
	AV0110	1" BSP	10	200
Air & vacuum reflief vavle	AV0163	2" BSP (PA66)	1	15
Air & vacuum reflief vavle	EV0134	3/4" BSP (PA66)	1	40
	EV0110	1" BSP (PA66)	1	40
	EV0150	1-1/2" BSP (PA66)	1	15
	EV0163	2" BSP (PA66)	1	15
Air & vacuum reflief vavle	IV0134	3/4" BSP (PA66)	1	50
	IV0110	1" BSP (PA66)	1	50
Air & vacuum reflief vavle	VE0134	3/4" BSP (PA66)	1	60
	VE0110	1" BSP (PA66)	1	60
